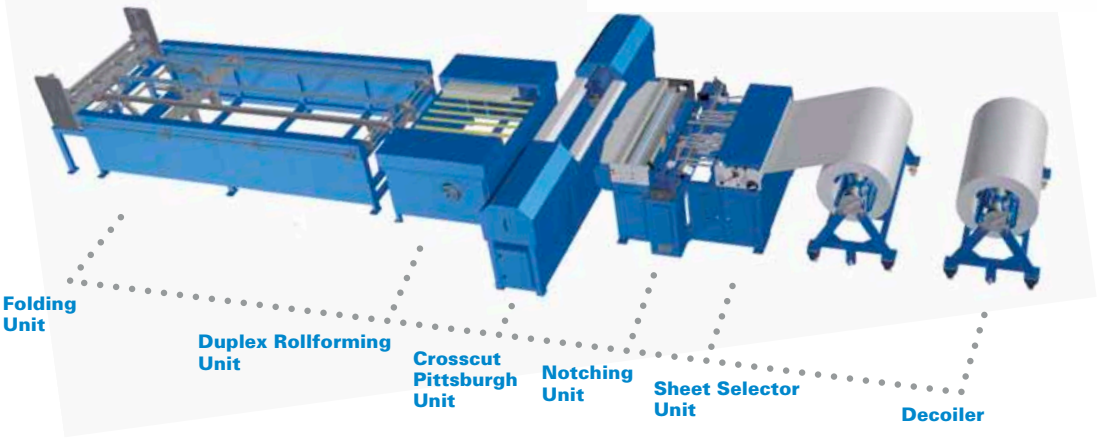
TWIN SEAM COMPACT

The rigid Compact Ductformer offers the highest output using a minimum of floor space.

The Compact has a fully hydraulic drive system that offers maximum force, strength and durability. It comes with the Spiro® state-of-the-art control system and one decoiler as standard.



Unique modular approach to boost your Twin Seam Compact into a fully automatic rectangular duct forming line with integrated flanges - expand gradually or at once, you decide!

Unique Features

- » Touch screen controller with genuine Spiro® user interface
- » Programs for L-sections, U-ducts, fully wrapped ducts or plain sheet
- » Z-Profile (Trapez-Profile and bead as option)
- » Fully hydraulic feeding, shear and folding unit
- » Stand-alone encoder for higher accuracy
- » Low investment
- » Smallest footprint in the industry

Technical Data	
Processable Sheet Thickness	0.5 - 1.25 mm (0.020" - 0.049")
Max. Coil Width	1500 mm (60")
Max. Coil Weight	1 x 5 tons
Duct Dimension for Box Sections	Min. 125 x 125 mm (4.9" - 4.9")
Capacity	5-8 tons/day
